For anyone with some experience playing Pragmatic Play slots, booting up Drago - Jewels of Fortune will surely offer a surprise or two. Visually, it looks strikingly different from their usual stuff, almost as if produced by a different studio altogether. After a line of somewhat mediocre games, this step up in quality is a welcomed one.

Drago - Jewels of Fortune is a fantasy slot that offers a couple of interesting features alongside impressive potential. There are dragons involved, but not Asian inspired as you might expect from this provider, but with more of a cartoonish touch. Drago also manages to keep the intrigue rolling due to its unusual reel formation and gameplay that can work well to generate some uncommonly large payouts - provided you aren't incinerated by a mouthful of dragon fire.

The game takes place in a dimly lit cavern, littered with treasure while a dragon watches over his coins to the side. This purple dragon, presumably Drago, though it's not made explicitly clear, sways like he's under the influence of something. Then again, it would be creepy if he just stood, staring motionless at you. It's a classic dragon sitting over his riches scene, capped with a powerful fantasy infused soundtrack adding extra atmosphere.

The game grid is an interesting one, made up of 5 reels, in a 5-4-4-4-5 configuration. The first and fifth reels possess an extra row, with a golden frame around each corner position. These special corner positions are the key to triggering the features - more on this later. Along with the larger than usual reel format is a larger than usual number of win ways. Winning combinations are formed of three or more matching symbols, from the first reel, left to right. Winning symbols can land in any row, which provides 1,600 ways to win, but are easy enough to follow along with.

The home screen brings up Pragmatic's ever-helpful volatility meter that lets players know exactly what they are getting in to before pressing play. In Drago's case, it scores 4.5/5 which might not be as volatile as it gets, but is still a high rating all the same. A figure that will find universal appeal is the default RTP, which at 96.5% is comfortably above average.
